PRESS RELEASE, January 12, 2026

ADALTRA, trusted partner of EDF and ENEDIS for the performance of tomorrow's networks

ADALTRA, a French designer and supplier of cables and connectivity solutions, announces that it has been selected by EDF and ENEDIS for an eight-year framework contract to supply cables and connectivity solutions for their infrastructure throughout France, including metropolitan France and overseas territories.

This contract marks a new phase of collaboration between ADALTRA, EDF, and ENEDIS, with the shared goal of supporting the evolution of energy networks in a context of technological, societal, and environmental transformation.

A contract at the heart of network modernization challenges

Energy networks are currently undergoing rapid change: the development of digital uses, the rise of connected equipment, increased requirements for system resilience, stricter regulatory requirements, etc.

In this context, cables and connectivity solutions are essential to guaranteeing quality, reliability, and performance of infrastructure.
Through this market, ADALTRA will provide its industrial and technical expertise to support EDF and ENEDIS's structural projects in the coming years.

French know-how at the service of critical infrastructure

With nearly 40 years of experience in the design and supply of cables and connectivity solutions, ADALTRA will deploy:

- Its technical expertise, based on in-depth knowledge of energy environments,
- Its national logistics capabilities, enabling smooth and continuous supply management,
- Its mastery of industrial and quality processes, ensuring traceability, compliance, and robustness of solutions,
- Its CSR commitment, part of a dynamic approach to environmental and social responsibility.

These elements form the foundation on which ADALTRA will mobilize its teams to meet the operational needs associated with the contract.

A strategic partnership based on performance and trust
“Much more than a contract, this market represents a true partnership in productivity, based on trust, performance, and innovation. It will highlight ADALTRA's expertise, built up over more than 40 years, and our ability to meet the technical, societal, and environmental requirements of EDF and ENEDIS.”
Jérôme Bureau, Business Developer, Energy & Infrastructure

About ADALTRA
ADALTRA is a French designer and supplier specializing in cables and connectivity solutions for network, industrial, and energy infrastructures. With over 40 years of experience, the company combines technical expertise, local support, and logistical know-how to meet the needs of the most demanding markets.
